

Press release

Cleanzone trade show

Professional solutions for cleanroom clothing

Dreieich, July 24, 2018. **CWS-boco/INITIAL with its brands Initial & CWS-boco present a joint cleanroom solution at the Cleanzone trade show in Frankfurt. Our expert consultants will provide information about our gold standard processes as well as customer-specific solutions regarding rental service to visitors.**

Rental service & gold standard

The company is a one-stop shop for the professional preparation of cleanroom clothing and delivers tailored solutions for effective contamination control in the entire service cycle. The utilization of RFID chips or bar codes ensures monitoring of every piece of clothing across its entire service life.

In addition, CWS-boco/INITIAL provides information on site regarding the gold standards for processes and service, guaranteeing the customer the same level of quality in all European cleanroom laundry locations, exceeding any statutory guidelines and regulations.

Innovative cleanroom suit

With CleanVision, INITIAL presents its innovative cleanroom suit for utilization in the pharmaceutical industry. The coverall has an integrated hood and an interchangeable visor. Different from traditional solutions, this creates a virtually self-contained system, thus significantly reducing contamination of customer products by the cleanroom operator. Safety is further increased by the innovative dressing process. Compared to previous

cleanroom suits, the changing process is demonstrably increased to under 2 minutes since only shoes and gloves have to be put on separately.

The experts are happy to consult interested visitors at the booth.

About CWS-boco

CWS-boco group is a leading provider of professional textile services and washroom hygiene solutions. This includes the well-known CWS towel, soap and fragrance dispensers and dust control mats as well as workwear and protective clothing by boco. All services are offered for flexible rental service. CWS-boco Germany is one of 16 subsidiaries of CWS-boco group. In 2017, together with Initial, the company entered into a joint venture in Central Europe. The company employs some 10,800 employees. In the new joint venture, Franz Haniel & Cie. GmbH holds a share of 82 percent and Rentokil Initial plc holds a share of 18 percent.

About Initial Cleanrooms

With over 35 years of experience in the decontamination of cleanroom clothing, Initial Cleanrooms is the market and technology leader for cleanroom rental solutions in Europe. The company offers tailor-made cleanroom clothing concepts with a gold standard, including professional care and decontamination of clothing in cleanrooms of the ISO classes 5, 7, 8 as well as delivery service. Highest standards for contamination control and a supply guarantee via several independent production facilities are just as important as comprehensive monitoring measures with complete process documentation. The company focuses on the following areas of expertise: Cleanroom textile service, mop service, cleanroom goggles service, cleanroom accessories and distribution of goods directly at the customer's location.
