

Ortner presents market innovation at the trade show "Cleanzone 2018"

The company Ortner Reinraumtechnik GmbH from Austria catches the market's attention with an innovation in the field of isolators: A "Cool & Heat Box", which allows a controlled temperature increase of the substance to be processed in the isolator. The market innovation will be presented on the 23rd and 24th of October 2018 at the "Cleanzone 2018" fair in Frankfurt/Main.

Ortner innovation at the "Cleanzone 2018"

The Villach-based company Ortner Reinraumtechnik GmbH promotes the development of new isolator models and technologies through extensive research activities. At the "Cleanzone 2018" fair hosted in Frankfurt, Ortner will present a market innovation on the 23rd and 24th of October 2018: For areas in which a controlled temperature increase in the substance must be ensured during the process, Ortner now has brought an additional innovation to the market. The isolators can be fitted with a "Cool & Heat Box" that is integrated directly in the isolator's chamber. The surface temperature of the box can be regulated between -10 and +150 °C.

At the same time, the isolator is **height-adjustable** from 300mm. This enables an ergonomic working position, whether sitting or standing. The isolator is equipped with castors to facilitate mobility, which comes in handy in service and maintenance work.

Gassing technology from Ortner will be presented

The Ortner ISU-H₂O₂ generator, an Ortner patent, will also be presented: ISU from Ortner is one of the most modern H₂O₂-generator systems on the market: a mobile generator for decontaminating rooms and systems using H₂O₂. The main advantage compared to the previous method of working with room decontamination is that users can monitor the process even outside the hazardous area. The gassing process is monitored via tablet from the outside. The use of mobile communication technology increases the flexibility and safety of users during a room decontamination.

The trade fair "Cleanzone" provides cleanroom knowledge at the highest level and is aimed at all industries that produce in clean rooms: From the pharmaceutical industry to medical technology to microtechnology. Ortner Reinraumtechnik GmbH will be present at the fair on both days in **Hall 5.1, Stand C50**.
