

Our company "Mikroclean" is specialised in cleanroom cleaning. With our know-how and years of experience, we help you to determine individual and economical solutions for your personal needs. As part of our own cleanroom academy, we offer you the opportunity to efficiently and successfully prepare your employees for cleanroom work in our Cleanroom Trailer.

#### Our cleanroom trainings

With our cleanroom training courses, you have the opportunity to prepare your cleanroom personnel on site for their work in your company. You can tailor the training objectives specifically and concretely to the requirements of your company. Up to now, such training courses could either take place in your own cleanroom, on the premises of our Academy or even without a cleanroom. However, these approaches are often associated with high costs and risks. On the one hand, employees often have the problem of having to travel to a training course. The costs for travel and accommodation must be borne by the respective company. In addition, the company's own clean rooms cannot be used for work or production for the duration of the training. In addition, there is a risk of contamination during the use of a clean room for training purposes, which can also lead to a loss of performance. Theoretical training without a cleanroom is also not recommended, as it provides the visualisation of the individual work steps that is necessary to be able to apply what has been learned in a meaningful way later on. With our Cleanroom Trailer, we have created a simple, safe and cost-effective way to offer cleanroom training anytime and anywhere.

#### What are the advantages of a Cleanroom Trailer?

In our fully equipped Cleanroom Trailer, your employees can be prepared for their first assignment in a cleanroom under realistic conditions. But the Mikroclean trailer can also be used to refresh specialist knowledge or to consolidate previously trained content in a sensible and effective way. The training content can be conveyed to the participants in a simple and comprehensible way with sophisticated colour representations. The special advantage of our Clean Room Trailer, however, is its flexible use. The mobile trailer comes directly to you and enables professional training on site without blocking existing clean rooms or having to organise long journeys for employees. Among other things, our trailer is equipped with a personnel lock and pass-through lock as well as special clothing and a table. It has a power connection and is heated and lit. The trainees can examine their wiping techniques for particle residues with the help of UV light and thus check their performance. Of course, the complete cleaning equipment is not missing to keep the cleanroom in good condition.

#### Conclusion

Are you curious about the latest cleanroom innovations? Then we look forward to your visit to our trade fair stand D31 at the Cleanzone from 23.11.2022 - 24.11.2022.
